WEIGHTS — Iron	30
Lead	30

IN presenting our new illustrated catalogue, in addition to a complete list of all goods continually carried in stock, we show details and dimensions of stock window frames for wood, plaster, and brick buildings; suggestive designs for odd and fancy windows and sash; also designs for special glass and solid panel doors.

On page 51 we give a list of heights of short doors, made by cutting one or more panels and rails from stock five cross panel doors. This will be found of value in many cases where short doors are required, thus saving the necessity of having them made to order.

We wish to call special attention to the quality of our stock. Our goods are all graded according to the highest standards. All windows, sash, and blinds are Eastern made, mortised, tenoned, and wood pinned, and are of full thickness; $1\frac{1}{2}$ -inch windows and sash measure full $1\frac{1}{2}$ inches and not $1\frac{3}{8}$ inches. All blinds are Eastern made, mortised, tenoned, and wood pinned, and are full $1\frac{1}{4}$ inches in thickness.

We suggest that in ordering odd or fancy windows that stock dimensions be followed as far as possible, for, in doing so, stock frames, blinds, and storm windows may be used at a considerable saving in cost over odd sizes.

A. W. HASTINGS & CO.,

134 Friend Street, Boston, Mass.

January 1, 1914.

In addition to goods listed in this catalogue which we constantly carry in stock, we make to order to any detail and in any kind of wood,

LEADED GLASS

WINDOW WEIGHTS (lead or iron)

SASH CORD

SASH CHAIN

ESTIMATING DEPARTMENT

We make a specialty of furnishing under contract, windows, frames, blinds, and doors, and are glad at any time to send competent men to estimate on any work of this nature.

SUGGESTIONS FOR ORDERING

When ordering, please remember that to get the goods you desire your order must be explicit.

WINDOW FRAMES

Orders for window frames should state size of glass or size of window, thickness of same, thickness of parting bead (all stock frames have $\frac{3}{8}$ -inch parting bead), width of jambs, whether frames are for wood or brick building and whether in shook or nailed up. If special or detail frames are required, send full-size drawing. If pulleys better than those carried in stock are required, specify what is desired.

BLINDS

Orders for blinds should state size of glass and number of lights in windows to be covered, or outside dimensions of blinds (stock blinds are same width as windows, $\frac{1}{2}$ inch longer for wood buildings and 2 inches longer for brick buildings). State if slats are to be half roll or stationary, whether No. 1 or No. 2 quality, whether for wood or brick building, and whether pairs, single, or four-fold blinds are required.

DOOR FRAMES

Orders for door frames should state size and thickness of doors, width and thickness of jambs, and kind of wood. (Casings or architraves are not included with door frames.)

WINDOWS

Orders for windows should state number of lights or design number (see pages 37-38), thickness of window, thickness of lip (all stock windows have $\frac{3}{8}$ -inch lips), kind and quality of glass required, whether to be stained, oiled, or primed. "Window" means two pieces to fill opening. "Sash" means one piece to fill opening.

DOORS

All orders for doors should state size, thickness, and kind of wood, style of moulding required, whether to have wood or glass panels. If special doors are required, details should be sent with order.

WEIGHTS AND CORD

It will be found advantageous to have weights and cord furnished with all windows ordered, in which case we send correct weights for each. If special cord is required, state size and kind.

SPECIAL AND DETAIL WORK

Orders for special and detailed frames, blinds, windows, or doors should be accompanied by full-size working drawings and specifications.

Detail of stock window frame for wood buildings.
 Jambs $5\frac{5}{8}"$ to set on boarding.
 See list of stock sizes next page.

WINDOW FRAMES

With hard pine jambs $5\frac{5}{8}$ " wide, to set on boarding.

With pockets and pulleys (for $1\frac{1}{2}$ " sash), $\frac{3}{8}$ " parting beads.

Stools, headers and head casings			Jambs, casings and parting beads		
Glass width	Sash width		Glass height	Sash height
